## PROFESSIONAL SUMMARY

Software engineer with 2 years of professional and volunteer experience and an A.S. in Computer Science. Specialized in frontend development using JavaScript, TypeScript, React, Next.js, Vercel, and TailwindCSS. Proficient in building scalable, user-centric web applications and well-versed in additional technologies such as Golang, Python, Java, and C++.

## EDUCATION

<b>Associate of Science, Computer Science</b> , Glendale Community College; Glendale, CA	<b>Dec 2024</b>
<b>CompTIA IT Fundamentals Certification</b> , Npower; Los Angeles, CA	<b>Nov 2023</b>
<b>Full Stack Coding Bootcamp</b> , Coding Dojo; Burbank, CA	<b>Oct 2022</b>
<b>Bachelor of Arts, Economics and French</b> , California State University; Chico, CA	<b>May 2020</b>

## PROFESSIONAL AND VOLUNTEER EXPERIENCE

**Fullstack Developer**, Hack for LA; Los Angeles, CA (remote) **Jan 2024 to Current**

- Facilitated the migration from HTML elements to MUI components, improving UI consistency and accessibility while streamlining future development for the project.
- Collaborated asynchronously through GitHub, managing issues, opening PRs, incorporating feedback, and investigating bugs to ensure timely and high-quality project updates.

**Customer Support Representative**, Groundwork Coffee; Los Angeles, CA **Sep 2024 to Current**

- Assisted in the migration from SAP to NetSuite by mapping data, testing integrations, and ensuring seamless data transfer, reducing downtime and improving system efficiency.
- Automated workflows and data management with Google Scripts in Google Sheets, cutting manual effort by 30% and enabling faster decision-making.

**Frontend Developer**, Transient Labs; Los Angeles, CA (remote); [transient.xyz](#) **Aug 2023 to Sep 2024**

- Boosted user growth by 5-10% MoM by contributing to the development of the landing page, which evolved into an active marketplace with integrated decentralized App interactions.
- Enhanced frontend reliability by developing reusable Storybook UI components, ensuring accessibility with React-Aria hooks, and deploying new versions of the Component Library via Vercel
- Collaborated with the Product team to verify Figma designs for accuracy, ensuring brand consistency and reducing design-to-development errors, which accelerated feature releases and improved platform quality.
- Improved SEO and user engagement with optimized Next.js routes and pre-rendering, boosting organic traffic by 15% and enhancing Core Web Vitals scores.
- Promoted code maintainability and user experience by implementing SCSS modules for encapsulated styles, standardizing styling with mixins, customizing Tailwind themes for branding, and creating custom animations with SCSS keyframes
- Supported high-value customer relationships by delivering custom projects, including React-Webflow integrations and Python-based metadata generation, driving client satisfaction and project success.

**Fullstack Developer**, MetaEngine; Los Angeles, CA (remote) **Dec 2022 to Aug 2023**

- Gained stakeholder alignment by building and refining multiple iterations of React prototypes for decentralized IP management using Wallet Connect and Wagmi.
- Streamlined deployments with a CI/CD pipeline using Docker and Terraform, cutting deployment time by 40% and enabling scalable AWS infrastructure.
- Designed user interfaces in Figma and created marketing assets with Adobe Illustrator, driving stronger engagement across products and campaigns.

**Customer Service Representative**, Coinbase Inc; Los Angeles, CA (remote) **Dec 2021 to June 2022**

- Ensured client satisfaction and minimized risk by managing hundreds of escalated support cases for high-value clients with balances over \$100,000, resolving complex trade and DeFi transaction issues using block explorers and SQL querying in Snowflake.

**Customer Service Representative**, ZenLedger; Los Angeles, CA (remote) **July 2021 to Nov 2021**

- Improved customer satisfaction scores by 20% by managing volume and inbox coverage, maintaining key high value customer relationships, updating and adding technical documentation

Los Angeles, CA | 530 965 7312 | Email: [luciechev@proton.me](mailto:luciechev@proton.me) | [LinkedIn](#) | [Github](#)

- Increased product stability and user experience by flagging, compiling, and prioritizing critical bugs for the engineering team, enabling faster issue resolution.

**Customer Experience Lead**, Service Response Partners; Chico, CA (remote)

**June 2020 to July 2021**

- Implemented dozens of customer support process improvements for Robinhood, LLC.
- Contributed to company-wide insights by co-authoring two official Robinhood Customer Experience reports, driving informed decision-making and improving customer satisfaction strategies.

## PROJECTS

---

**GitHub Repository Search Program** [Github Repository](#), TechStack: Golang

- A terminal ran program that allows you to search for GitHub repositories using a keyword. It uses the GitHub API and displays repository details such as the name, owner, stars, and # of issues. The program is written in Go and requires a GitHub personal access token to authenticate API requests.

**Gwei Check** Live Site: [gweicheck.app](#) | [Github Repository](#), TechStack: Python, Flask, SQL, Heroku

- Designed and developed a Django application within 8 days, integrating Blocknative API and a ClearDB database to provide users with real-time Ethereum transaction costs and an email alert system, while enhancing user experience with dynamic background color visualization.

**Clipperton Island Yacht Club** Live Site: [Deployed URL](#) | [Github Repository](#), TechStack: React, Firebase, TailwindCSS

- Live website for the official Clipperton Island Yacht club. Visitors can read about the club, contact the admin, purchase merchandise, submit scientific forms, join as a member and order burgees.

**Degree Progress** Live Site: [Deployed URL](#) | [Github Repository](#), TechStack: React, Vite, TailwindCSS, Firebase

- Mobile optimized website to log my Associate of Science Computer Science degree progress using multi-series pie chart from ChartsJS.

**HabitHero** [Github Repository](#), TechStack: React, Nextjs, TailwindCSS

- A fullstack app with React/Next.js frontend and Prisma/SQLite backend, featuring a retractable sidebar, page routing, email subscription with validation, "Player" object storage, unit tests, and display of saved emails.

## HACKATHONS

---

**Note to Chef** [Github Repository](#), TechStack: React, Node.js, Reactstrap, Netlify

- *Winner of the Spirit of Girl Develop It GDI Hackathon 2022*, Collaborated with a team of 9 developers to transform Figma designs into a mobile-optimized React web app using Reactstrap, deployed on Netlify, and integrated Spoonacular API for recipe data.

**Class Connect** [Github Repository](#), TechStack: React, Node.js, Tailwind, MongoDB

- *2nd place at Girl Develop It GDI Hackathon 2023*, integrated with VideoSDK to enable classroom style video conferencing in 1 week of development.
